E-2. SANDER & ACCESSORY

New State Of The Art Features

Ergonomic Design

The unique grip design as well as rubber overmold create an excellent non-slip feel, and the rubber grip also has the advantage in insulating from cold. Also, the shape of the housing conforms to operator's hand with proper wrist position for greater comfort and control.

Less Weight

Adopting of composite and lightweight materials, non-vacuum models weigh only 2 lbs, still lighter in weight than any other comparable sander.

Low Profile Design

Only 3.6" height allows pad to be kept flat on working surface for better finishes; provides greater operator visibility and improves control.

Hardened Steel Alloy Cylinder

Longer cylinder life less maintenance.

Less Vibration

The air motor is suspended by vibration-absorbing rubber rings to minimize vibration for ease of control.

Low Sound Levels

New muffling system reduces sound levels to as low as 80 dB.

One-Piece Speed Control Lever

Standard on all models.

Perfectly Balanced Weight-Mated Pad

Our premium urethane pads are made of quality construction for the ultimate in swirl-free finishes.
5"-100 grams
6"-130 grams

Extra Strength Vacuum Hose

Excellent rebonding performance prevent vacuum hose suffering from severe squashing and stretching, making vacuum system much more durable than others.

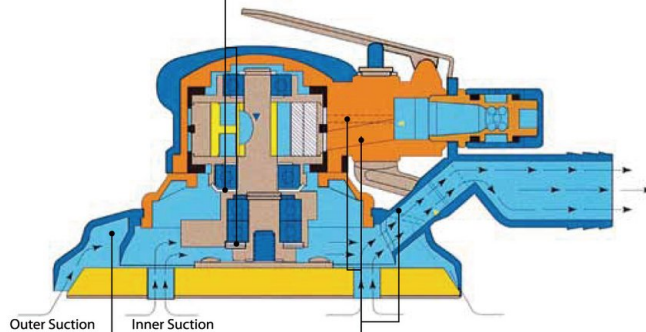

More Efficiency, More Power

Well-designed new five blades rotor as well as independent airway design produce more useful power. As a result, less air (5 CFM) is used more efficiently to maintain maximum power.

Innovative Anti-Dust Protection System

The innovative seal system (USD 6,343, 982 B1) design insulates the air motor and bearings from sanding residue and eliminates contamination. Also, the design provides more efficient extraction of dust and is proved for long life and lowest maintenance.

Outer Suction Inner Suction

Dual Vacuum Shroud

The dual vacuum shroud patent pending features an extra vacuum pick-up around the outer edge of sanding pad that extracting the sanding residues spreading outward and provides a dust free environment.
Applicable for BMA 1984A~1993A & 1255A-1/-2.

Unique Airway and Vacuum Design

The intake and exhaust air flow are insulated by an O-ring (USA 5, 879, 228) to prevent the mixing of intake and exhaust air that results in higher air motor power and enhances vacuum pick-up.
